

## The Balcon Del Castillo Development

The Development: Comprising of four Town Houses, six Apartments and two Flats, all with a south facing aspect, the buildings have been designed to a very high specification, in an area above the village, to give outstanding views of the surrounding countryside, yet close to the shops and amenities of the village.

Most of the dwellings have at least two tiled bathrooms with bath and shower, and a separate cloakroom with washbasin and toilet. Kitchens are fully fitted, having solid wood doors and granite worktops. Included are dishwashers, ovens, hobs, washing machines and fridge freezers.

Windows are double-glazed, with electronically controlled window blinds (persianas). Each sitting room, and some bedrooms have French doors leading on to a balcony.

In all living rooms and bedrooms, preliminary wiring and plumbing is included for air conditioning, together with satellite, TV, computer and telephone points to most rooms. The lighting is to northern European standards and there are many power points in all rooms.

There is plenty of built-in storage space, and one space per dwelling in the covered, secure garage.
